RECS NATIONAL GO DAY

London, UK
1 December 2026

REGOs, RGGOs, and beyond: proving origin and impact

Programme

09:00 - 10:00 **REGISTRATION & CHECK-IN**

Arrive, collect your badge, and enjoy welcome refreshments.

10:00 - 10:15 **WELCOME ADDRESS**

RECS Energy Certificate Association, DLA Piper, and SmartestEnergy will launch the event's fundamental question: how and why EACs are evolving from a simple instrument for fuel mix disclosure and proving the origin of energy into a broader tool for supporting credible energy use claims, evidencing emissions reductions, and rewarding system outcomes? They will also 'take delegates' temperature' through a survey asking whether energy certificates still exist in their current form in 2035.

SPEAKERS

- Adam White | RECS
- Vishnu Aggarwal | Smartest Energy
- Andreas Gunst | DLA Piper

10:15 - 11:15 **SESSION 1 - THE FUTURE OF ELECTRICITY ATTRIBUTES: REGO MARKET UPDATE**

This session will give delegates all the latest information on trends in the REGO market. Experts will present core data, including volumes, prices, and liquidity, and innovations including granularity. The speakers will also discuss how corporate procurement trends and emerging products, including granular certification could impact the market as a whole. Panellists will consider how REGO market dynamics can prove impact through, for example, rewarding flexibility, efficiency and storage.

SPEAKERS

- Marie Bluett | RECS-UK
- Ivan Debay | Origo
- Stephen Woodhouse | Afry
- Oran Kavanagh | SSE
- Emilie Tretow Busellato | Statkraft

11:15 - 11:45 **COFFEE & NETWORKING BREAK**

11:45 - 12:45 **SESSION 2 - FROM ELECTRONS TO MOLECULES: RGGO AND CLEAN FUELS MARKET UPDATE**

This session will give delegates all the latest information on trends in the RGGO and clean fuels (SAF, H2, etc.) markets. Experts will present core data, including volumes, prices, liquidity, and the influence of national support schemes. Panellists will also discuss whether these markets are converging or diverging on traceability, emissions, and value. The session's speakers will cover cross-border (UK-EU-US) interoperability, physical energy flows, book-and-claim and mass balance systems, and energy carrier conversion.

SPEAKERS

- Vineet Arora | SmartestEnergy UK
- Kenneth Wallace-Mueller | DLA Piper
- Deniz Duman | Argus Media
- Johnny Holst | Shell

12:45 - 14:00 **NETWORKING LUNCH**

Connect with peers and build meaningful relationships.

RECS NATIONAL GO DAY

London, UK
1 December 2026

REGOs, RGGOs, and beyond: proving origin and impact

14:00 - 15:00

SESSION 3 - SCOPE 2 EMISSIONS ACCOUNTING: THE FUTURE OF CREDIBLE CLAIMS AND CONSUMER VALUE

This session's expert speakers will update delegates on the medium-term development of corporate scope 2 emissions reporting under evolving international standards. The session will discuss how such standards could support closer alignment on electricity markets and carbon policies between the UK and EU. The panellists will also ask whether standardising RECS policy asks such as full consumption disclosure and monthly matching of production and consumption could boost the impact of EAC markets. Underlying the session will be the question of market-based emissions accounting versus location-based.

SPEAKERS

- Merve Güngör | RECS
- James Hall | Evolve Energy
- Eleonore Lazat | Granular
- Emine-Duygu Sisman | EPEX Spot
- Robert White | ARK Data Centre

15:00 - 15:30

COFFEE & NETWORKING BREAK

15:30 - 16:30

SESSION 4 - OWNERSHIP, CONSUMPTION AND SYSTEM OUTCOMES: UK/EU LEGAL UPDATE

This session's speakers will discuss how near-term changes to EAC regulations could support positive interaction between EAC markets and the transition of the physical energy system to renewables. They will ask whether a changing role for EACs, beyond being disclosure instruments, might impact their use, tradability, attribution and credibility. Delegate's will hear expert opinions on how governments and regulators can balance consumer choice, market efficiency and decarbonisation objectives.

SPEAKERS

- Adam White | RECS
- Andreas Gunst | DLA Piper
- Ivana Đurović | The Energy Community
- Daniel Arnesson | Veyt

16:30 - 17:00

CLOSING SESSION - ENERGY ATTRIBUTES IN 2035: PROVING ORIGIN OR PROVING IMPACT?

We will close with a discussion, with audience input, on the longer-term future of energy attribute systems and markets – out to 2035 and beyond. This session's speakers will ask whether EACs will still fundamentally certify the origin of energy production, or will they be required to go further and provide evidence of a positive impact on the energy transition. Polls will ask the audience for their opinions of the future roles, values, and requirements of EACs.

SPEAKERS

- Adam White | RECS
- Tom Lindberg | RECS Board
- Vishnu Aggarwal | SmartestEnergy
- Andreas Gunst | DLA Piper

17:15 - 19:00

NETWORKING RECEPTION - DRINKS WITH SMALL BITES

Network and discover creative projects and solutions from our community.
