

Why join RECS?

Join one of the largest
networks of renewable energy
market participants

Who we are

Our objective is clear. We strive to combat climate change by cutting emissions in line with science-based targets. We work to cut emissions by accelerating the energy transition to 100% renewables. We accelerate this transition by facilitating the choice to buy renewables.

Energy Attribute Certificates (EACs) allow us to buy and sell renewable energy. They are the tool RECS and our members use to unlock our vision of an accelerated energy transition. We support the development of new EAC markets and the strengthening of those already in place. We engage with a wide range of stakeholders, including governments, market participants, and consumers, and provide the knowledge and information they need to boost consumer demand for renewable energy. RECS works to provide the knowledge, motivation, and confidence needed to buy 100% renewable energy.

The work we do

Hosting world leading events on the development of renewable energy markets

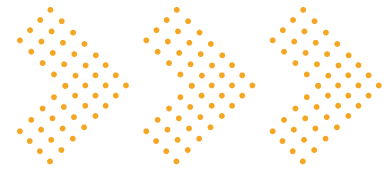

Communicating with and coordinating the RECS membership to maximise our impact

Prioritising support for RECS members through exclusive access to working groups, technical and policy papers, standard contracts and much more

Engaging with legislators and policy makers to ensure highly effective renewable energy markets

Working with regulators to develop and maintain efficient and reliable renewable energy systems

RECS Member Benefits

RECS members belong to a large and growing community of key players who are at the forefront of developments in renewable energy markets. You will benefit from:

1

Expert Knowledge

Members have full access to the knowledge of our secretariat, which includes experts on tracking systems, energy attribute certificates (EACs) and consumer claims.

RECS Members also benefit from reduced price and early ticket availability for RECS events including the REC Market Meeting, national GO days, and the Open Markets Committee conference.

2

Having a voice in the organization

Exclusive access to RECS' policy and technical papers, including RECS' standard contracts for EECs GOs, I-RECS, and biomethane certificates

Being a RECS member allows you to be closely involved with the work of the organisation and provide input during members-only meetings, including on the development of the work programme and our general strategy. This involvement supports our lobbying, which has a real effect on the market and delivers change on behalf of our members.

3

Access to working groups

Exclusive access to member only working groups where RECS' advocacy positions and market tools are developed

As a member, you can play a significant role in the organisation by joining working groups that tackle the most important issues we address. These groups review draft documents and reports on topics such as future policies for EAC systems, innovations in renewable energy markets, the certification of non-electricity energy carriers, and the development of standard contracts for EAC trading.

Our work at RECS is carried out with our members and for our members. All those committed to supporting an accelerated energy transition through renewable energy markets are invited to join us and become part of a thriving community.

As a RECS member, your organisation can help identify the issues we work on and shape RECS' message.

Details of the RECS Membership

The RECS annual membership fee depends on the type of company and its location. For generators and wholesale market actors the fee also depends on the size of the company. The chart below shows the fees in detail. Fees apply as of the 1st of January 2022*. To sign up for the RECS membership, please contact the secretariat to request the Membership Application form.

Membership fee (per calendar year)

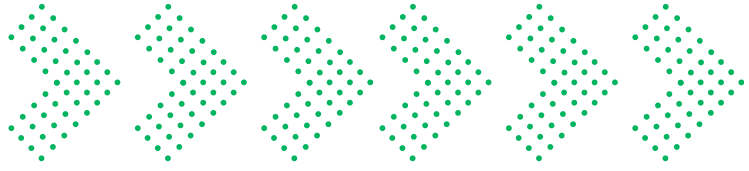

Membership type		Europe	Non-Europe
Standard RECS Membership Generators or wholesale market actors**	< 5 FTE	€ 5,000	US\$ 3,000
Small RECS Membership Generators or wholesale market actors***	< 5 FTE	€ 1,500	US\$ 1,000
Consumer or end users****		€ 2,000	US\$ 1,500
Non-profit organisations***		€ 0	US\$ 0

* The RECS board will review membership prices in 2024, and new prices and price structure may apply as of 1st January 2025

** Generators or wholesale market actors: entities whose primary business is the production, sale, trade, supply or provision of services in the energy industry.

*** For small and non-profit memberships, RECS will ask for proof of organisation size and status.

**** Consumers or end-users: entities whose primary business is anything other than production, sale, trade supply or provision of services in the energy industry.
